Work Experience

Web Development and Cybersecurity Intern

African Burial Ground Memorial Foundation

Jun 2026 - Aug 2026

- Developed and maintained website content to improve functionality, accessibility, and overall user experience.
- Updated and organized digital content across website and social platforms to support outreach and visibility.
- Assisted with cybersecurity efforts by identifying potential risks and helping protect organizational data and online platforms.

Information Technology Support Assistant

St. John's University School of Law

Apr 2026 - Present

- Deliver frontline technical support to Law School students, faculty, and staff by resolving hardware, software, and connectivity related issues.
- Serve as an on call technician for IT incidents, responding to support requests through university ticketing systems with a focus on timely resolution.
- Collaborate with full-time IT staff to maintain high service standards and support reliable technology operations in a fast paced academic environment.

Student Ambassador

St. John's University

Aug 2025 - Present

- Represent the university at admission events by answering questions and supporting prospective students' decision making.
- Lead campus tours for prospective students and families while presenting academic programs, resources, and student life opportunities.

Network Leader, St. John's R.I.S.E. Network

Jun 2024 - Present

- Mentored first year students by providing guidance on academics, campus resources, leadership and professional development.
- Connected mentees with over 10 campus resources, and leadership programs, expanding access to academic and career support.

Projects

Linux System Administration Lab | VirtualBox, Ubuntu, Linux

June 2026

- Built and configured an Ubuntu Server using VirtualBox on Apple Silicon
- Configured user accounts, groups, storage, networking, and OpenSSH remote access
- Managed Linux permissions and system resources using command-line administration tools

SecurePass | Eclipse IDE, JavaScript

July 2026

- Developed a Java-based password manager in Eclipse using object-oriented programming principles
- Utilized Java Collections, File I/O, exception handling and Base64 encoding to create a secure menu-driven console application

Leadership

Future Business Leaders of America – President

May 2026 - Present

- Lead an executive board of 7 members and oversee professional programming, operations, and engagement
- Increased member engagement by strengthening participation in workshops, competitions, conferences, and campus events

ACM Student Chapter – Events Coordinator

Apr 2026 - Present

- Coordinating 10 events per semester serving over 40 students, overseeing scheduling, logistics, promotion, and event execution
- Collaborating with 7 other board members to deliver technical workshops and career development opportunities
